

Sweave Example 1

Friedrich Leisch

December 1, 2011

In this example we embed parts of the examples from the

```
> a = runif(1000)
> print(summary(a))
```

Min.	1st Qu.	Median	Mean	3rd Qu.	Max.
2.984e-05	2.444e-01	5.236e-01	5.019e-01	7.499e-01	1.000e+00

which shows that the location parameter of the Ozone distribution varies significantly from month to month . Finally we include a boxplot of the data :
